SUMMARY

AI/ML Engineering fresher pursuing a B.Tech in Artificial Intelligence and Machine Learning (CGPA: 8.9/10), with hands-on experience building Retrieval-Augmented Generation (RAG) systems, LLM-powered applications, and machine learning models through academic projects and internships. Proficient in Python, NLP, vector databases (FAISS, ChromaDB), and backend frameworks (Flask, FastAPI, Streamlit).

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, HTML, CSS
GenAI & LLM: Prompt Engineering, RAG, Embeddings, Gemini, Groq, GPT
AI Frameworks: LangChain, LangGraph (Basics), LangSmith
ML, DL & NLP: Scikit-learn, TensorFlow, NLTK (Basics)
Backend & Web: Flask, FastAPI, Streamlit, React (Basics)
Databases & Vector Stores: MySQL (Basics), MongoDB (Basics), FAISS, ChromaDB
Data Science: NumPy, Pandas, Matplotlib
Developer Tools: Git, GitHub, Jupyter Notebook, Google Colab

INTERNSHIP EXPERIENCE

EDUNET Foundation × AICTE — Generative AI Intern Feb 2026 – Aug 2026

- Developed RAG-based GenAI applications for question answering over domain-specific documents.
- Built document processing pipelines covering chunking, embeddings, vector similarity search, and context retrieval.
- Integrated LLMs with retrieved knowledge to generate context-aware, grounded responses.
- Developed Streamlit interfaces to interact with RAG applications and evaluate response quality.

AICTE–EduSkills — Google Cloud Generative AI Virtual Internship Aug 2026 – Oct 2026

- Completed an 8-week virtual internship with weekly modules, assessments, and project submissions.
- Studied Generative AI fundamentals, Responsible AI, Prompt Engineering, Multimodal AI, and Vertex AI.
- Covered diffusion models, attention mechanisms, transformers, embeddings, multimodal RAG, Gemini, and MLOps with Vertex AI.

PROJECTS

AI-Powered Resume Screening & Candidate Ranking System
Python, NLP, Scikit-learn, Pandas, Streamlit

- Built an NLP-based system that evaluates resumes against job requirements and ranks candidates, with a Streamlit interface.

RAG Document Intelligence Assistant
Python, LangChain, LLMs, Embeddings, Streamlit

- Built a document assistant using LangChain, embeddings, and vector search to answer questions from user documents.
- Implemented the full pipeline (chunking, retrieval, and LLM response generation) with a Streamlit interface.

Email Spam Detection & Classification System
Python, Scikit-learn, TF-IDF, Multinomial Naive Bayes, Flask

- Developed a spam classifier using TF-IDF and Multinomial Naive Bayes, achieving 99.1% accuracy, with a Flask interface for real-time prediction.

EDUCATION

Mohan Babu University, Tirupati Expected 2027
B.Tech in Artificial Intelligence and Machine Learning, CGPA: 8.9 / 10
Coursework: Data Structures, DBMS, Operating Systems, Computer Networks, Machine Learning, Deep Learning

CERTIFICATIONS

IBM — Machine Learning | IBM — Deep Learning
